

Road Surgeons Pavement Tech Class 2

Overview of Role:

Pavement Techs are involved in most civil construction projects, typically found on projects such as roads, bridges, footpaths, car parks, bike paths, container yards and airport runways.

Typically pavements we work on are bitumen spray seals, asphalt and concrete.

The work is mainly outdoors and requires physical fitness and due to restricted access to certain pavements, night shifts may be required.

Pavement Tech Class 2 is the second level of competency for various pavement repair and maintenance activities. As a Pavement Tech Class 2 you will be fully competent in all aspects of Pavement Tech Class 1 as well as various other higher skill sets. You are required to be able to operate more independently, with less supervision. You will be competent operating a range of more specialised machinery such as skid steer loaders, excavators, rollers, pressure grouting equipment. Also you will be required to drive MR/HR Trucks with a trailer in tow. With experience you can move on to operating asphalt pavers, crack sealing machines, bitumen sprayers (cold & hot), and HC Trucks.

Personal Requirements:

To be successful as a Pavement Tech Class 2 you must:

- Have good comprehension of English (Speak, Read and Write)
- Have NSW OH & S General Induction (White Card)
- Have MR or HR Drivers Licence
- Enjoy practical and manual work
